# Gross and Net Density

## Assumptions

- *Gross Density* – Density over the gross land area (including streets, sidewalks and open space).
- *Net Density* – Density over only the built land area (not including streets, sidewalks and open space).

# Potential Scenario Options

- **Trend:** The County will continue to grow and develop in the same patterns as the past
- **Plan build out:** The County builds out what is in local plans.
- **Other themes:** Test GHG targets, community visions and aspirations, Transit-Oriented Development etc.

# Example Scenario Themes – *Tulsa Comprehensive Plan*

## **A** TRENDS CONTINUE

## **B** MAIN STREETS

## **C** NEW CENTERS

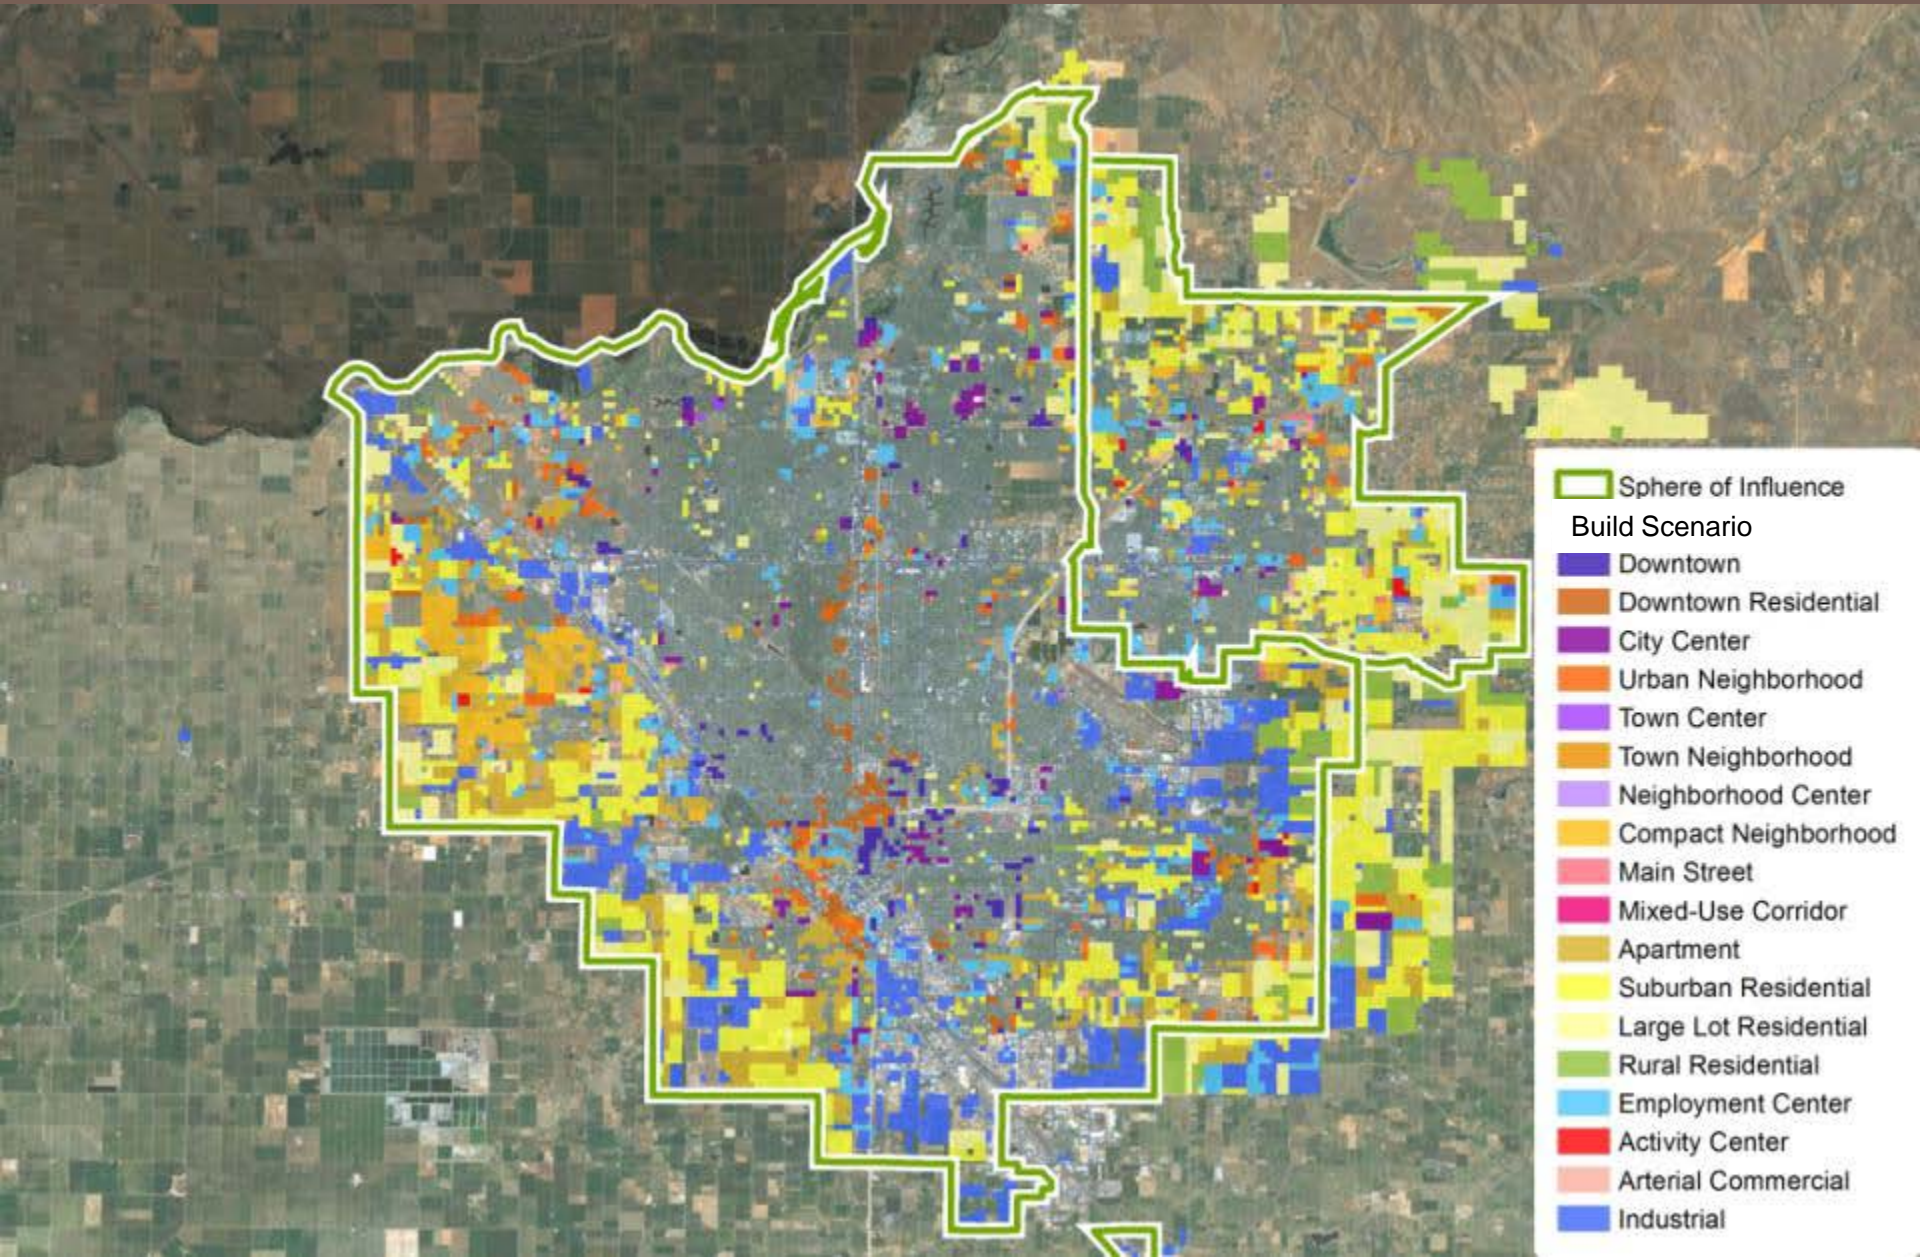

## **D** CENTERED CITY

# Fresno PTIS Phase 2 - Three Scenarios

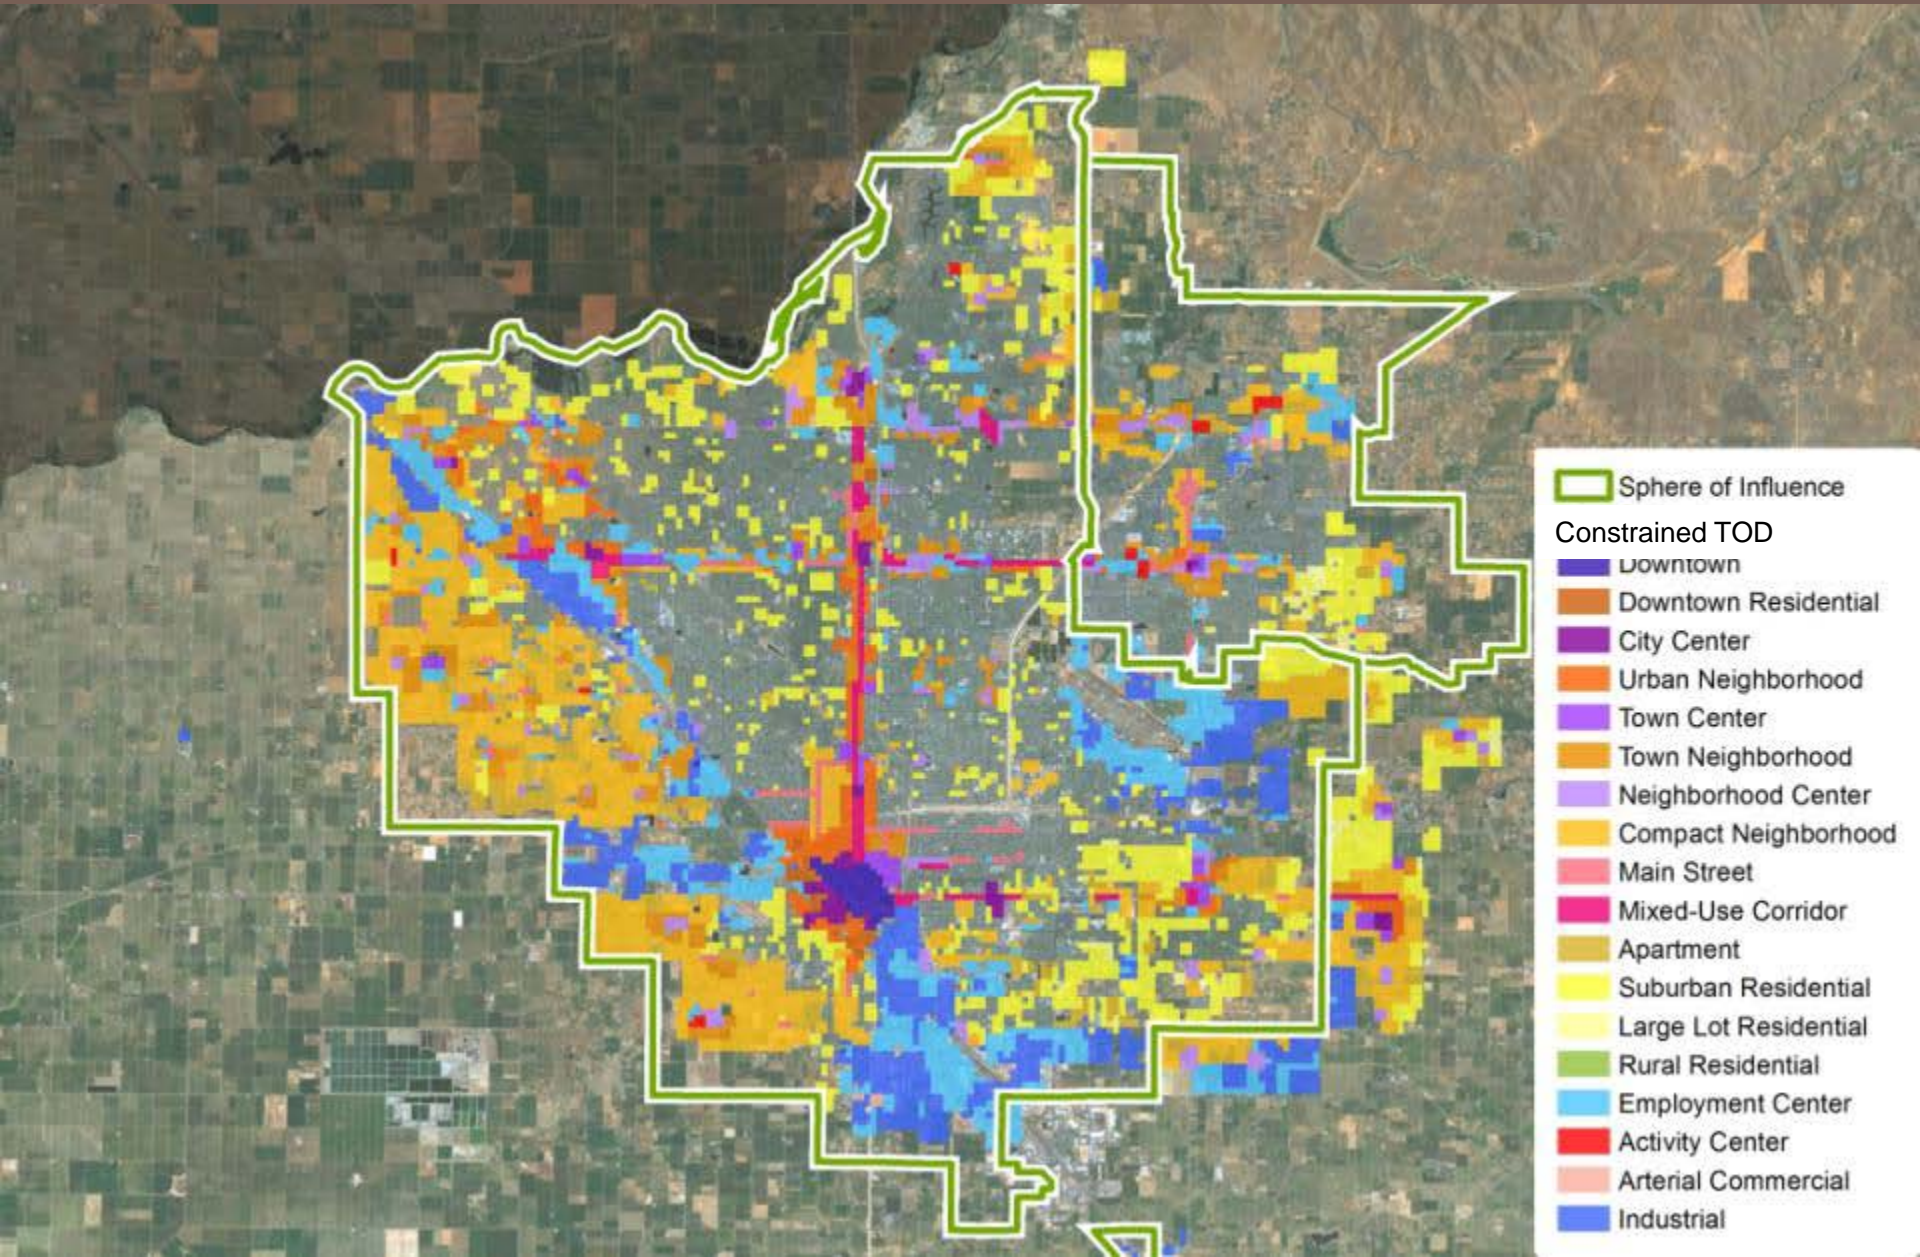

1. *Build Scenario:* Growth allocated by TAZ forecasts. In some cases growth does not fit in the TAZ. This which results in a lower overall number.
2. *Constrained TOD Scenario:* First attempt to reallocate growth in a transit supportive design. Used Strategic Economics forecasts of TOD potential.
3. *Full Build Out TOD Scenario:* More aggressive attempt to reallocate growth onto corridors for a transit supportive design. This scenario reallocated all growth from SEGA into the city boundaries of Fresno and Clovis.
