Nov-Dec

Approval of the
Regional ATP

PROJECT OVERVIEW

Active Transportation is human-powered travel, including walking, bicycling, and using a wheelchair. These activities have many important health, economic, environmental, and social benefits:

- Helping families get to schools, parks, work, shopping, restaurants, and bus stops
- Improving health and reducing the incidence of disease and obesity
- Reducing air pollution
- Saving money on gas and car maintenance

However, many neighborhoods were developed without good trails, sidewalks, and bike lanes that make walking and biking safe and comfortable for everyone. The Fresno County Regional Active Transportation Plan is an important step toward fixing this problem.

WHAT IS AN ATP?

The Active Transportation Plan (ATP) will be a comprehensive guide that creates a vision for a network of trails, bike lanes, sidewalks, and other elements to support safe walking and bicycling in each city and across Fresno County.

WHY WE NEED YOUR HELP

Nobody knows your neighborhood better than you! We need your help to identify where the biggest needs and opportunities are to make walking and biking safer, more enjoyable, and a great way to get around.
