## What does the program do?

The Fresno COG Circuit Planner and Circuit Engineer are available to provide technical assistance to local agencies for smaller transportation or smart growth-related projects/tasks that support the Fresno COG Regional Transportation Plan/Sustainable Communities Strategy, or other obstacles in the funding or delivery of projects.

## Sample projects include, but are not limited to:

- Transportation and land use studies
- Environmental documents for transportation/land use studies
- Land use and transportation policy development
- General plan and zoning ordinance studies and updates related to transportation and land use
- Grant funding applications for transportation and land use studies

*Please see larger example list of projects on back.*

## Have a project in mind? Tell us about it below.

Please provide some basic information about your project so we can better assist you.
