

Measure C Renewal Technical Working Group Formation

EXHIBIT B

- 43 member TWG will consist of transportation professionals, member agency planning/public works staff, transit providers, modal advocates, air quality advocates, CBOs, environmental advocates, public health representatives, transportation stakeholders and the public
- TWG work will be advised by scientific polling, 2022 RTP/SCS, local, regional/state transportation and air quality data, professional experiences of TWG members, input from modal, environmental, public health advocates, and community input
- TWG will be doing the “heavy lifting” that goes into developing recommendations for the new Measure C Expenditure Plan after hearing extensive presentations on our region’s long-range vision as defined in the RTP/SCS, demographics, growth forecasts, funding sources, needs analysis, system conditions, etc.
- TWG will provide recommendations/direction to FCTA/VRPA (consultant) on the “framework” of the new Expenditure Plan.
- VRPA will work with FCTA/COG to evolve the framework developed by the TWG into a written format and create an initial draft document for the Executive Committee to review
