* The initial Income-Shift adjustment results in a discrepancy between the Regional Determination by income tier and the sum of allocations by income tier. To address this, Fresno COG made manual adjustments that resulted in reduced allocations of the very low- and/or low-income tiers for jurisdictions with an existing share of units in these income tiers that is greater than the Regional Determination and corresponding increases to those jurisdiction's allocations in the moderate- and above moderate-income tiers.

**Additional manual adjustments (of 1.0 or -1.0) were made to address discrepancies with the total allocation and the sum allocations by income tier resulting from rounding in previous steps.
