

Citizen Oversight Committee Meeting 4/11/24

The following local agencies had Expenditure Reports that the COC had questions on and were asked to bring back.

County of Fresno - Trail funds

Response from County: The plan is to use the urban and rural trail funds for the local match for various Active Transportation Projects we currently have in design for in Biola, Calwa, Tranquility, at Herndon-Barstow Elementary, and Del Rey. The Measure C funds are leveraging ATP funds, since using a higher local match allowed many of these to get funded. In the past, rather than leveraging these funds, the County was waiting to have an enough funding to construct a project entirely with Measure C funds, which is why there are large balances in these areas.

City of Orange Cove – St. Main and Flex funds do not match

I have not heard back from Orange Cove. The staff member I was communicating with has left the city. I have new contacts that I have reached out to. They are working on the report.

City of Selma – ADA Funds

City of Selma stated that the reason they have not used much of the ADA funding is because they do not have enough to propose a cost-effective project. However, this upcoming fiscal year, they do plan to propose a project with that funding.
